Installation and Removal Instructions for Windows PostScript and PCL Printer Drivers – Release 8

This ReadMe file contains the instructions for installing the Custom PostScript and PCL Printer Driver on Windows systems. The Custom PostScript and PCL Printer Drivers allow you to send PostScript or PCL language jobs to the printer and enable printer specific features. This allows you to print from standard desktop applications such as word processors, presentation graphics, and image manipulation software.

Installing the Custom PostScript and PCL Printer Drivers

The Custom PostScript and PCL Printer Drivers can be installed on the following operating systems:

- Windows 7 – 32-bit/64-bit

- Window Server 2008 – 32-bit/64-bit

- Windows Vista – 32-bit

- Windows Server 2003 – 32-bit/64-bit

- Windows XP – 32-bit/64-bit

If you have any old versions of the Printer Driver installed on your system, delete the old version before installing the new version. For more information, see Removing the Custom PostScript or PCL Printer Driver on page 8.

The procedures for installing the Custom PostScript and PCL Printer Driver assume that you have a zip program installed on your system. Before proceeding, verify with your Windows administrator that you have the appropriate privileges to install the Custom PostScript or PCL Printer Driver.

To install the Custom PostScript or PCL Printer Driver on Windows 7:

1. If this computer has had a previous version of this driver installed, go to Removing the Custom PostScript or PCL Printer Driver on page 8 first, then proceed with the installation.

2. Close all open applications.

3. Navigate to the folder where you saved the .zip file.

4. Double-click the PSDW32_<brand>_xx_xx_<language>.zip file or
   PCLW32_<brand>_>_xx_xx_<language>.zip file.
   A window appears and displays the contents of the .zip file.

5. Extract the files to a folder on your Hard Drive.

   NOTE: If you unzip file to the C:\ drive, the files will be extracted to the
   C:\<brand>\PS_xx.xx\<language> folder or C:\<brand>\PCL_xx.xx\<language> folder.

6. Close the zip program.

7. Click the *Start* button and select *Control Panel*.
   The *Control Panel* window appears.

8. Select *Devices and Printers*.
   The *Devices and Printers* window appears.

9. Click Add a printer.
   The *Add printer* window appears.

10. Select *Add a local printer*.
    The *Choose a printer port* window appears.

11. Do one of the following:

    - If a TCP/IP port is available for the printer, do the following:

        a. Select *Use the following port*.

        b. From the drop-down menu, select the port to use.

        c. Click *Next*.

    - If you have not created a TCP/IP port for the printer, do the following:

        a. Select *Create a new port*.

        b. From the *Type* drop-down menu, select *Standard TCP/IP Port*.

        c. Click *Next*.
           The *Type a printer hostname or IP address* window appears.

        d. In the *Hostname or IP address* field, type the IP address for the printer.

        e. Deselect *Query the printer and automatically select the driver to use*, if necessary.

        f. Click *Next*.
           The *Additional port information required* window appears.

        g. Click *Custom*.

        h. Click *Settings*.
           The *Configure Standard TCP/IP Port Monitor* window appears.

        i. From the *Protocol* area, select *LPR*.

        j. In the *Queue Name* field, type `default`.

      k. Select *LPR Byte Counting Enabled*.

      l. Click *OK*.

      m. From the *Additional port information required* window, click *Next*.

   The *Install the printer driver* window appears.

12. Click *Have Disk*.
The *Install From Disk* window appears.

13. Click *Browse*.
The *Locate File* window appears.

14. Navigate to the directory where you extracted the files and select the .inf file for the Custom PostScript or PCL Printer Driver.

15. Click *Open*.
The *Install From Disk* window returns.

16. Click *OK*.
The *Install the printer driver* window returns.

17. Click *Next*.
The *Type a printer name* window appears.

NOTE: If the *Which version of the driver do you want to use?* window appears, stop and remove the existing driver first. See Removing the Custom PostScript or PCL Printer Driver on page 8.

18. In the *Printer name* field, modify the name of the Printer Driver, if necessary.

19. Click *Next*.
The *Windows Security* window appears and confirms that you want to install the device software.

20. Select *Always trust software from "Eastman Kodak Company"*.

21. Click *Install*.
The *Printer Sharing* window appears.

22. Select *Do not share this printer*.

23. Click *Next*.
The *You've successfully added the <printer name>* window appears.

24. If you are installing the PCL Printer Driver and you want it to be the default printer, select *Set as the default printer*.

25. If you want to print a test page, click *Print a test page*.

26. Click *Finish*.
The Custom PostScript or PCL Printer Driver is ready to be used.

27. Close the *Printers and Devices* window.

28. If you have upgraded to a new version of the driver, restart the computer.

NOTE: You do not need to restart the computer if this is the first time you have installed the driver on this computer.

To install the Custom PostScript or PCL Printer Driver on Windows Vista:

1. If this computer has had a previous version of this driver installed, go to Removing the Custom PostScript or PCL Printer Driver on page 8 first, then proceed with the installation.

2. Close all open applications.

3. Navigate to the folder where you saved the .zip file.

4. Double-click the PSDW32_<brand>_xx_xx_<language>.zip file or
    PCLW32_<brand>_>_xx_xx_<language>.zip file.
    A window appears and displays the contents of the .zip file.

5. Extract the files to a folder on your Hard Drive.

    NOTE: If you unzip the file to the C:\ drive, the files will be extracted to the
    C:\<brand>\PS_xx.xx\<language> folder or C:\<brand>\PCL_xx.xx\<language> folder.

6. Close the zip program.

7. Click the *Start* button and select *Control Panel*.
    The *Control Panel* window appears.

8. From the *Hardware and Sound* list, select *Printer*.
    The *Printers* window appears.

9. Click *Add a printer*.
    The *Choose a local or network printer* window appears.

10. Click *Add a local printer*.
    The *Choose a printer port* window appears.

11. Do one of the following:

    *   If a TCP/IP port is available for the printer, do the following:

        a. Select *Use the following port*.

        b. From the drop-down menu, select the port to use.

        c. Click *Next*.

    *   If you have not created a TCP/IP port for the printer, do the following:

        a. Select *Create a new port*.

        b. From the *Type of port* drop-down menu, select *Standard TCP/IP Port*.

        c. Click *Next*.
            The *Type a printer hostname or IP address* window appears.

        d. In the *Hostname or IP Address* field, type the IP address for the printer.

        e. Deselect *Query the printer and automatically select the driver to use*, if necessary.

        f. Click *Next*.
            The *Additional Port Information Required* window appears.

        g. Select *Custom*.

        h. Click *Settings*.
            The *Configure Standard TCP/IP Port Monitor* window appears.

        i. From the *Protocol* area, select *LPR*.

        j. In the *Queue Name* field, type `default`.

    k. Select *LPR Byte Counting Enabled*.

    l. Click *OK*.

  The *Install the printer driver* window appears.

12. Click *Have Disk*.
    The *Install From Disk* window appears.

13. Click *Browse*.
    The *Locate File* window appears.

14. Navigate to the directory where you extracted the files and select the .inf file for the Custom PostScript or PCL Printer Driver.

15. Click *Open*.
    The *Install From Disk* window returns.

16. Click *OK*.
    The *Install the printer driver* window returns.

17. Click *Next*.
    The *Type a printer name* window appears.

    NOTE: If the *Which version of the driver do you want to use?* window appears, stop and remove the existing driver first. See Removing the Custom PostScript or PCL Printer Driver on page 8.

18. In the *Printer name* field, modify the name of the Printer Driver, if necessary.

19. If you want the Custom PostScript or PCL Printer Driver to be the default printer, select *Set as the default printer*.

20. Click *Next*.
    The *Windows Security* window appears and confirms that you would like to install the device software.

21. Select *Always trust software from "Eastman Kodak Company"*.

22. Click *Install*.
    After the files are installed, the *You've successfully added the <printer name>* window appears.

23. If you want to print a test page, click *Print a test page*.

24. Click *Finish*.
    The Custom PostScript or PCL Printer Driver is ready to be used.

25. Close the *Printers* window.

26. Close the *Control Panel* window.

27. If you have upgraded to a new version of the driver, restart the computer.

    NOTE: You do not need to restart the computer if this is the first time you have installed the driver on this computer.

To install the Custom PostScript or PCL Printer Driver on Windows Server 2003 or Windows XP:

1. If this computer has had a previous version of this driver installed, go to Removing the Custom PostScript or PCL Printer Driver on page 8 first, then proceed with the installation.

2. Close all open applications.

3. Navigate to the folder where you saved the .zip file.

4. Double-click the PSDW32_<brand>_xx_xx_<language>.zip file or
   PCLW32_<brand>_>_xx_xx_<language>.zip file.
   A window appears and displays the contents of the .zip file.

5. Extract the files to a folder on your Hard Drive.

   NOTE: If you unzip the file to the C:\ drive, the files will be extracted to the
   C:\<brand>\PS_xx.xx\<language> folder or C:\<brand>\PCL_xx.xx\<language> folder.

6. Close the zip program.

7. Select *Start > Settings > Printers and Faxes* (Windows Server 2003) or *Start > Printers and Faxes* (Windows XP).
   The *Printers and Faxes* window appears.

8. Double-click *Add Printer*.
   The *Welcome to the Add Printer Wizard* window appears.

9. Click *Next*.
   The *Local or Network Printer* window appears.

10. Select *Local printer attached to this computer*.

11. Deselect *Automatically detect and install my Plug and Play printer*, if necessary.

12. Click *Next*.
    The *Select a Printer Port* window appears.

13. Do one of the following:

    - If a TCP/IP port is available for the printer, do the following:

        a. Select *Use the following port*.

        b. From the drop-down menu, select the port to use.

        c. Click *Next*.

    - If you have not created a TCP/IP port for the printer, do the following:

        a. Select *Create a new port*.

        b. From the *Type of port* drop-down menu, select *Standard TCP/IP Port*.

        c. Click *Next*.
           The *Welcome to the Add Standard TCP/IP Printer Port Wizard* window appears.

        d. Click *Next*.
           The *Add Port* window appears.

        e. In the *Printer Name or IP Address* field, type the IP address for the printer.

        f. Click *Next*.
           The *Additional Port Information Required* window appears.

        g. Select *Custom*.

   h. Click *Settings*.
       The *Configure Standard TCP/IP Port Monitor* window appears.

   i. From the *Protocol* area, select *LPR*.

   j. In the *Queue Name* field, type `default`.

   k. Select *LPR Byte Counting Enabled*.

   l. Click *OK*.

   m. From the *Additional Port Information Required* window, click *Next*.
       The *Completing the Add Standard TCP/IP Printer Port Wizard* window appears.

   n. Click *Finish*.

The *Install Printer Software* window appears.

14. Click *Have Disk*.
    The *Install From Disk* window appears.

15. Click *Browse*.
    The *Locate File* window appears.

16. Navigate to the directory where you extracted the files and select the .inf file for the Custom PostScript or PCL Printer Driver.

17. Click *Open*.
    The *Install From Disk* window returns.

18. Click *OK*.
    The *Install Printer Software* window returns.

19. Click *Next*.
    The *Name Your Printer* window appears.

    NOTE: If the *Use Existing Driver* window appears, stop and remove the existing driver first. See Removing the Custom PostScript or PCL Printer Driver on page 8.

20. In the *Printer name* field, modify the name of the Printer Driver, if necessary.

21. Do one of the following:

    - If you want the Custom PostScript or PCL Printer Driver to be the default printer, select *Yes*.

    - If you do not want the Custom PostScript of PCL Printer Driver to be the default printer, select No.

22. Click *Next*.
    The *Printer Sharing* window appears.

23. Select *Do not share this printer*.

24. Click *Next*.
    The *Print Test Page* window appears.

25. Do one of the following:

    - If you want to print a test page, select *Yes*.

    - If you do not want to print a test page, select *No*.

26. Click *Next*.
    The *Completing the Add Printer Wizard* window appears.

27. Click *Finish*.
    The *Hardware Installation* message appears and verifies that you want to continue installing the device software.

> **NOTE:** To verify that the driver is signed, navigate to the directory where you extracted the files on the hard drive. Right-click the .cat file and select *Properties*. Click the *Digital Signature* tab to view information indicating that the driver has been signed.

28. Click *Continue Anyway*.
    The Custom PostScript or PCL Printer Driver is ready to be used.

29. Close the *Printers and Faxes* window.

30. If you have upgraded to a new version of the driver, restart the computer.

    > **NOTE:** You do not need to restart the computer if this is the first time you have installed the driver on this computer.

Removing the Custom PostScript or PCL Printer Driver

To effectively remove the Printer Driver, you must remove all printers that use the driver, and then remove the driver itself.

To remove the Custom PostScript of PCL Printer Driver from Windows 7:

1. Click the *Start* button and select *Control Panel*.
   The *Control Panel* window appears.

2. Select *Administrative Tools*.
   The Administrative Tools window appears.

3. Double-click *Print Management*.
   The *Print Management* window appears.

4. Expand the *Custom Filters* folder, if necessary.

5. Select the *All Printers* folder.

6. Right-click the Printer Driver and click *Delete*.
   The *Print Management* message appears and confirms that you want to delete the printer.

7. Click *Yes*.

8. Select the *All Drivers* folder.

9. Right-click the Printer Driver and select *Remove Driver Package*.
   The *Print Management* message appears and confirms that you want to delete the driver.

10. Click *Delete*.

11. Click *OK*.

    If the *Print Server Properties* message appears and states that the Printer Driver is in use, click *OK*, restart the computer, and repeat this procedure.

12. Close the *Print Management* window.

13. Close the *Administrative Tools* window.

14. Close the *Control Panel* window.

15. Restart the computer, if necessary.

To remove the Custom PostScript or PCL Printer Driver from Windows Vista:

1. Click the *Start* button and select *Control Panel*.
   The *Control Panel* window appears.

2. From the *Hardware and Sound* list, select *Printer*.
   The *Printers* window appears.

3. Do one of the following:

   - Right-click the Customer PostScript or PCL Printer Driver that you want to remove and select *Delete*.

   - Right-click the Customer PostScript or PCL Printer Driver that you want to remove press [Delete] on the keyboard.

   The *Printers* message appears and confirms that you want to remove the printer.

4. Click *Yes*.

5. From the *Folders* list in the left pane of the *Printers* window, right-click *Printers* and select *Run as Administrator > Server Properties*.
   The *Print Server Properties* window appears.

6. Select the *Drivers* tab.

7. Select the Printer Driver to remove.

8. Click *Remove*.
   The *Remove Driver And Package* window appears.

9. Select *Remove driver and driver package*.

10. Click *OK*.
    The *Print Server Properties* message appears and confirms that you want to remove the Printer Driver.

11. Click *Yes*.
    The *Remove Driver Package* window appears.

    NOTE: If the *Print Server Properties* message appears and states that the Printer Driver is in use, click *OK*, restart the computer, and repeat this procedure.

12. Click *Delete*.

13. Click *OK*.

14. Click *Close* to close the *Print Server Properties* window.

15. Close the *Printers* window.

16. Close the *Control Panel* window.

17. Restart the computer, if necessary

To remove the Custom PostScript or PCL Printer Driver from Windows Server 2003 or Windows XP:

1. Select *Start > Settings > Printers and Faxes* (Windows Server 2003) or *Start > Printers and Faxes* (Windows XP).
    The *Printers and Faxes* window appears.

2. Do one of the following:

    -   Right-click the Custom PostScript or PCL Printer Driver that you want to remove and select *Delete*.

    -   Select the Custom PostScript or PCL Printer Driver that you want to remove and press [Delete].

    The *Printers* message appears and confirms that you want to remove the printer.

3. Click *Yes*.

4. Select *File > Server Properties*.
    The *Print Server Properties* window appears.

5. Select the *Drivers* tab.

6. Select the Printer Driver to remove.

7. Click *Remove*.
    The *Print Server Properties* message appears and confirms that you really want to remove the Printer Driver.

8. Click *Yes*.

    NOTE: If the *Print Server Properties* message appears and states that the Printer Driver is in use, click *OK*, restart the computer, and repeat this procedure starting at step 4.

9. Click *Close* to close the *Print Server Properties* window.

10. Close the *Printers and Faxes* window.

11. Restart the computer, if necessary.
